Roll Fed Trade Laminator

The Educator Roll Fed Laminator is a reliable and easy to use machine that has been designed and built with low volume users in mind. Offering the control needed to laminate different types of materials using different films with a minimum of operator adjustments.

Ideal for posters, graphics and visuals of all kinds, the Educator is a dependable, high quality, easy-to-use machine.

Specifications

Laminating Width	up to 635mm
Speed	2m/min
Power Supply	15 Amps
Laminating Thickness	3mm max
Roll Core Size	25mm
Dimensions	810 x 280 x 410mm
Weight	34kg

Preset lamination pressure & speed

Makes machine easier to use and eliminates many possible sources of problems.

Enclosed laminating & pull rollers

Eliminates time consuming jams and is a useful safety feature.

Forced air cooling

Allows lamination with 75 micron and 125 micron films. Without a cooling system, thicker films warp or ripple.

Fixed position lamination rollers

Provide stable platform for uniform roller pressure.

Gives highest quality lamination available for schools.

Attached safety shield

Polycarbonate shield is clear for optimum use, doesn't conduct heat and is fixed in place.

Reverse switch

Essential to avoid problems and clear misfeeds.

Adjustable supply roll tension

Simple control knobs to eliminate wrinkles.

▲ Variable temperature control

▲ Reverse switch to avoid problems and clear misfeeds

▲ Attached safety shield for added protection
