Build quality & reliability

Durable design with sturdy metal case construction.

Porous bronze bearings are permanently lubricated for long life.

Moulded silicon rollers to withstand elevated temperatures to enable use with thicker films.

All electrical components are mounted to grounded chassis for added safety.

Brushless gear motor for long trouble-free life.

Simple design for ease of use

Fan cooled outlet table to prevent 'lost' media.

Finned heat sink for additional cooling.

Illuminated power switches serve as a reminder, warning and ready signal.

Carrier operation (any size) and carrier free operation (up to A6).

Built in thermometer.
