

# Add Value

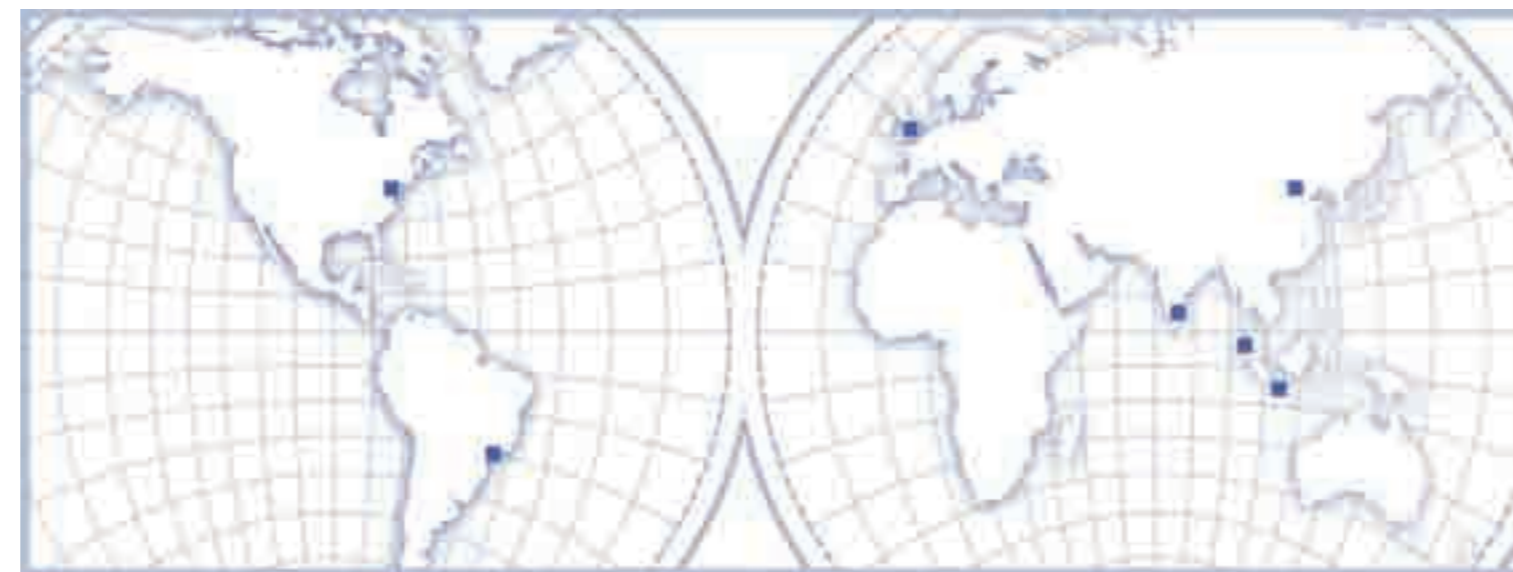

by adding

# Rippatape™

Rippatape™ provides no-knife easy opening for paper and board products including corrugated cases, fibreboard cartons, envelopes and papersacks.

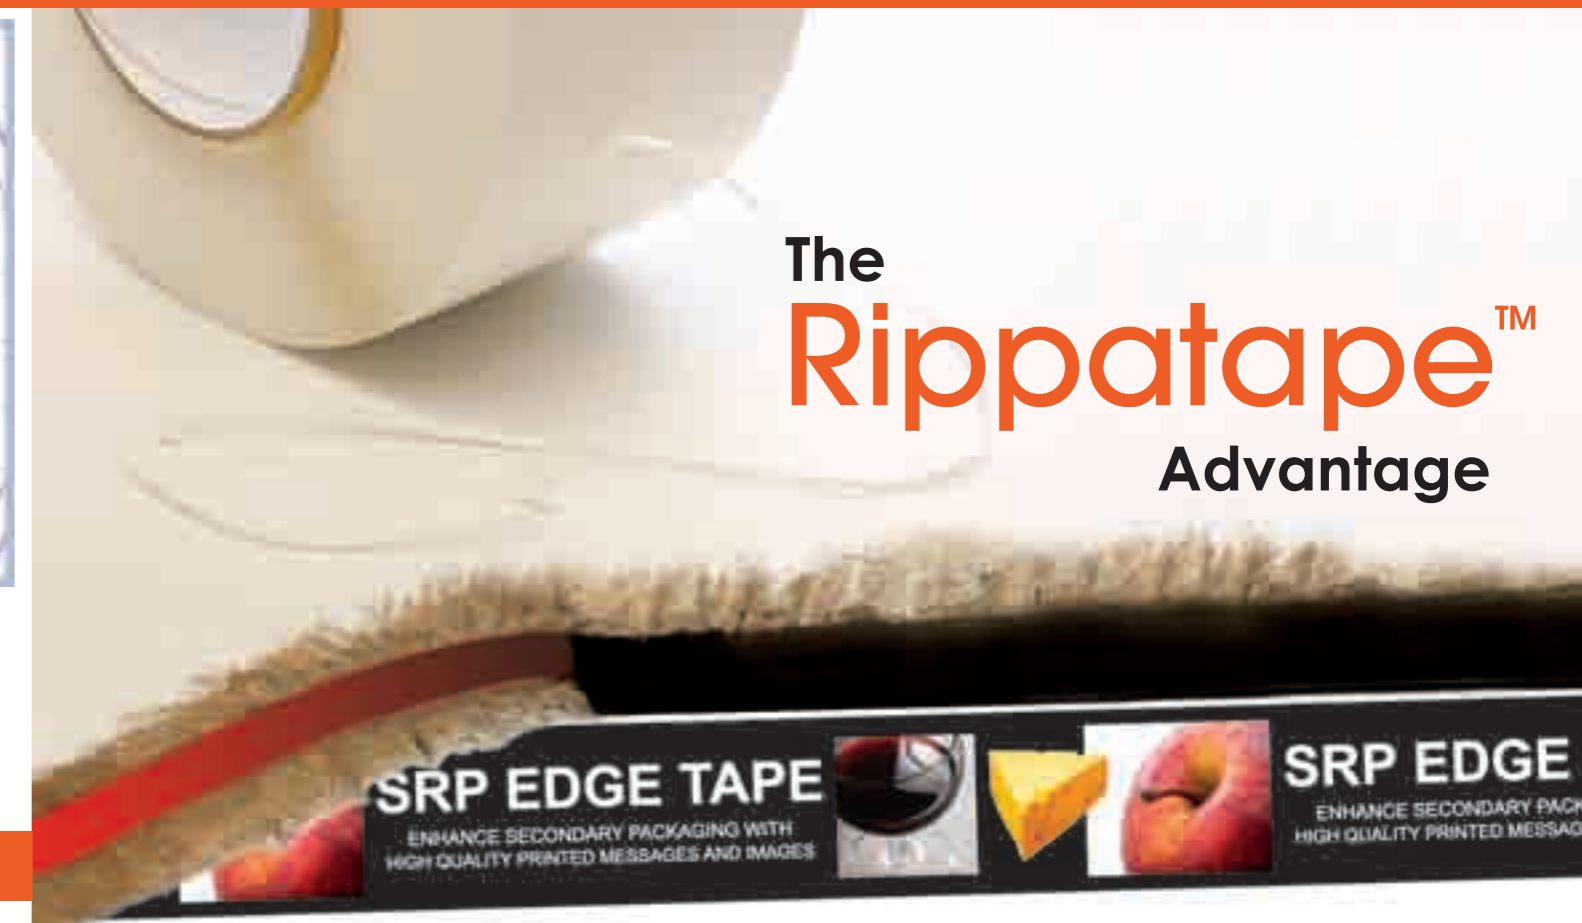

By adding Rippatape™ from Payne you'll be able to provide your customers with added-value solutions while benefiting from:

- **Reduced changeovers and downtime** - longer reel lengths of up to 60km per reel maximise your running time.
- **Avoiding tape snapping** – all our tapes are manufactured from high quality MOPP or HDPE.
- **Tapes tailored to your needs** – Payne's extensive range of tapes will meet your specific requirements:
  - Widths – 2.0 to 30mm
  - Lengths – 2.5 to 60km
  - Gauges – 60, 80,90 and 125mic
  - Print – Rippatape is printable for additional marketing opportunities
- **No negative effects on board recyclability** - water based adhesive means the tape separates from the board during recycling giving cradle-to-cradle reassurance.

# PAYNE

# Apply Rippatape™ without reducing line speed

Payne has over 50 years of experience supplying tape and applicators into the corrugated and fibreboard industries.

By partnering with Payne you'll benefit from:

- **A quick response and reliable service** – due to our dedicated customer service, sales and warehousing located in every region and manufacturing sites in strategic global locations.
- **Support available wherever it is needed** – provided through our world class technical and sales service.
- **Quality material globally** - we trade in more than 100 countries worldwide with global standards maintained between regions.
- **Continuous improvement and innovation** – we actively implement continuous improvement through Six Sigma and continuously innovative to ensure we and our partners remain at the forefront of this dynamic industry.

Capable of applying tapes at speeds that match the latest corrugators lines, our applicators are modular in design allowing each system to be built according to your requirements.

Features are specified by you and can include:

- **Automated head positioning** - motorised and pre-programmable for quick changes between jobs and accurate tape placement during set up.
- **Touch screen controls** - can be integrated into the control room for easy set up and operation.
- **Accurate tape placement** - industry proven E&L web guiding equipment ensures accurate placement during production.
- **Up to 8 heads** - can be configured to apply 8 lanes of tape or two groups of 4 heads can be arranged in tandem allowing automatic follow on when a reel runs out of tape.
- **Accurate tape tension** - via servo driven unwind avoiding issues such as short boarding.
- **Tape run-out detection** - sensors alert operators when a reel change needs to be made.

Our extensive industry experience has guided our development process ensuring we provide solutions designed with your needs in mind.

# Rippatape™ for SRP/RRP

As an example of Payne's continued innovation in this industry we are pleased to introduce our latest SRP Edge Tape system which will ensure you remain at the cutting edge of box opening.

Payne's SRP Edge Tape solution ensures:

- **Easy Open** - tape core role, no-knives and one-motion opening.
- **Easy Shelf** - tape provides tray edge reinforcement holding products securely in place.
- **Easy Identification** - tape can incorporate contents or logistical information.
- **Easy Dispose** - tape separates from board during the recycling process.
- **Easy Shop** - high quality print, integrated shelf-talkers and encourages stand-out.
